

WP	Leader	Name of the Milestone	Year 1												Year 2												Year 3											
			1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36
WP1	FBK	Project Management	[Gantt bars for WP1]																																			
T1.1	FBK	Project Administrative Coordination	[Gantt bar]																																			
T1.2	FBK	Technical Management	[Gantt bar]																																			
T1.3	FBK	Quality Assessment and Risk Management	[Gantt bar]																																			
D1.1	FBK	Risk Identification and Management & Quality plan	[Gantt bar]																																			
D1.2	FBK	Interim activity report	[Gantt bar]																																			
D1.3	FBK	Periodic activity report	[Gantt bar]																																			
D1.4	FBK	Periodic management report	[Gantt bar]																																			
D1.6	FBK	Public final activity report	[Gantt bar]																																			
D1.7	FBK	Final PUDI	[Gantt bar]																																			
D1.8	FBK	Final management report	[Gantt bar]																																			
D1.9	FBK	Final report on the distribution of the Community's contribution	[Gantt bar]																																			
WP2	STE	Architecture definition and development	[Gantt bars for WP2]																																			
T2.1	ST-Italy	Use case definition and system requirements	[Gantt bar]																																			
T2.2	STE	System and Requirements analysis	[Gantt bar]																																			
T2.3	metaio	Framework development (mobile AR client)	[Gantt bar]																																			
T2.4	ST-Italy	SW development, delivery and support	[Gantt bar]																																			
T2.5	STE	Next generation architecture	[Gantt bar]																																			
T2.6	metaio	Server infrastructure and communication	[Gantt bar]																																			
D2.1.1	ST-Italy	Use cases, application definition and system requirements for STE U8500-based platform	[Gantt bar]																																			
D2.1.2	ST-Italy	Use cases, application definition and system requirements for next STE platform	[Gantt bar]																																			
D2.2.1	STE	Early Detailed Design Specifications for STE U8500-based platform	[Gantt bar]																																			
D2.2.2	STE	Refined Detailed Design Specifications for STE U8500-based platform	[Gantt bar]																																			
D2.2.3	STE	Detailed Design Specifications for next STE platform	[Gantt bar]																																			
D2.3.1	metaio	First implementation of junaio-based AR framework for STE U8500-based platform	[Gantt bar]																																			
D2.3.2	metaio	Second implementation of AR framework integrating deliverables of WP4/WP5	[Gantt bar]																																			
D2.3.3	metaio	Optimization of prototype based on evaluation	[Gantt bar]																																			
D2.4.1	ST-Italy	STE U8500-based platform baseline delivery, integrating existing AR framework	[Gantt bar]																																			
D2.4.2	ST-Italy	First STE U8500-based platform baseline delivery, implementing D2.2.1 specifications	[Gantt bar]																																			
D2.4.3	ST-Italy	Second STE U8500-based platform baseline delivery, implementing D2.2.2 specifications	[Gantt bar]																																			
D2.4.4	ST-Italy	Next STE platform baseline delivery, implementing D2.2.3 specifications	[Gantt bar]																																			
D2.5	STE	Recommendation for HW, SW and system improvements for next generation platform	[Gantt bar]																																			
D2.6.1	metaio	First server-side API and architecture	[Gantt bar]																																			
D2.6.2	metaio	Second server-side API and architecture	[Gantt bar]																																			
MS1		First delivery of STE U8500 and junaio based platform baseline	[Gantt bar]																																			
MS2		First server-side API and architecture	[Gantt bar]																																			
MS3		Second delivery of STE U8500 based platform baseline	[Gantt bar]																																			
MS4		Second prototype implementation of AR framework	[Gantt bar]																																			
MS5		Second server-side API and architecture	[Gantt bar]																																			
MS6		Delivery of STE next generation platform baseline	[Gantt bar]																																			
WP3	INRIA	User interface and interaction design	[Gantt bars for WP3]																																			
T3.1	INRIA	User expectations from Mixed Reality and cross modal interaction	[Gantt bar]																																			
T3.2	INRIA	Interface and Interaction Design	[Gantt bar]																																			
D3.1	INRIA	Report on user expectations and cross modal interaction	[Gantt bar]																																			
D3.2	INRIA	Interface design prototypes and/or mock ups	[Gantt bar]																																			
D3.3	INRIA	Final report on interface and interaction design	[Gantt bar]																																			
MS7		User interface feedback from platform V1, recommendations for V2	[Gantt bar]																																			
MS8		User interface feedback from platform V2, recommendations for V3	[Gantt bar]																																			
WP4	FBK	Context Sensing and Interpretation	[Gantt bars for WP4]																																			
T4.1	INRIA	Hardware sensor interpretation	[Gantt bar]																																			
T4.2	INRIA	Auditory scene analysis	[Gantt bar]																																			
T4.3	FBK	Visual analysis of the environment and geo-position refining	[Gantt bar]																																			
T4.4	Fraunhofer	Physical surroundings modelling	[Gantt bar]																																			
T4.5	SE	What is, or could be, going on around me?	[Gantt bar]																																			
D4.1	STE	Synchronized dataset containing a dump of all on-board sensors of a real device...	[Gantt bar]																																			
D4.2	FBK	Report on expected platform requirements of WP4 algorithms	[Gantt bar]																																			
D4.3	ST-Italy	WP4 outcome definitions and API Specification for inter-task / inter-WP communications	[Gantt bar]																																			
D4.4	FBK	Prototype of and Report on multi-modal estimation of geo-location and orientation	[Gantt bar]																																			
D4.5	Fraunhofer	In-the-lab prototype of and Report on visual analysis and reconstruction of the scene	[Gantt bar]																																			
D4.6	FBK	Final prototype integrating all WP4 outcomes	[Gantt bar]																																			
MS9		First version of chain for geo-localization / orientation estimation, based on ...	[Gantt bar]																																			
MS10		Final version of chain for geo-localization / orientation estimation	[Gantt bar]																																			
MS11		PC version of visual analysis and reconstruction of the scene, ready for integration	[Gantt bar]																																			
WP5	Fraunhofer	Adaptive Content Harvesting, Creation and Delivery	[Gantt bars for WP5]																																			
T5.1	Fraunhofer	3D Content Creation	[Gantt bar]																																			
T5.2	Fraunhofer	3D Content Fusion	[Gantt bar]																																			
T5.3	FBK	Web-of-Data AR Social, Semantic Data-Mining	[Gantt bar]																																			
T5.4	metaio	Appropriate Content Delivery	[Gantt bar]																																			
D5.1	Fraunhofer	First Algorithms for and Report on 3D Visual and Audio Content Creation	[Gantt bar]																																			
D5.2	FBK	First Algorithms for and Report on 3D Social Data Mining	[Gantt bar]																																			
D5.3	metaio	First Prototype API for Adaptive Content Delivery	[Gantt bar]																																			
D5.4	Fraunhofer	Prototype Software for and Extended Report on 3D Visual Content Creation and Fusion	[Gantt bar]																																			
D5.5	FBK	Prototype Software for and Extended Report on 3D Social Data Mining	[Gantt bar]																																			
D5.6	metaio	Prototype API for and Extended Report on Appropriate Content Delivery	[Gantt bar]																																			
D5.7	FBK	Report on Web of Data AR Social Semantic Data Mining	[Gantt bar]																																			
MS12		Preliminary Requirements for Adaptive Content Harvesting, Creation and Delivery for WP2	[Gantt bar]																																			
MS13		Final Requirements for Adaptive Content Creation and Delivery for WP2	[Gantt bar]																																			
WP6	ST-Italy	Technology Integration, Evaluation and Test-cases	[Gantt bars for WP6]																																			
T6.1	SE	Verification of Human Interface Acceptance	[Gantt bar]																																			
T6.2	ST-Italy	Maximize the Quality of Experience according to the context	[Gantt bar]																																			
T6.3	ST-Italy	Profiling, bottleneck detection and software optimization	[Gantt bar]																																			
T6.4	ST-Italy	Platform integration and demonstration	[Gantt bar]																																			
D6.1	ST-Italy	Report on the performance of platform profiling tools and techniques	[Gantt bar]																																			
D6.2	ST-Italy	Specifications for the use-case targeted QoS/QoE infrastructure	[Gantt bar]																																			
D6.3	ST-Italy	Use case(s) implemented on VENTURI integrated platform V1	[Gantt bar]																																			
D6.4	SE	Report on use-case benchmarking and QoE	[Gantt bar]																																			
D6.5	ST-Italy	Use case(s) implemented on VENTURI integrated platform V2	[Gantt bar]																																			
D6.6	SE	Final report on use-case benchmarking and QoE	[Gantt bar]																																			
D6.7	ST-Italy	Use cases implemented on VENTURI integrated platform V3	[Gantt bar]																																			
MS14		Definition of platform profiling tools and metrics and VENTURI platform V1	[Gantt bar]																																			
MS15		First feedback iteration and improved VENTURI platform V2	[Gantt bar]																																			
MS16		Final Integrated release V3	[Gantt bar]																																			
WP7	metaio	Dissemination and Exploitation	[Gantt bars for WP7]																																			
MS	FBK	Project's Website	[Gantt bar]																																			
MS	Fraunhofer	Dissemination and communication activities	[Gantt bar]																																			
MS	metaio	Exploitation management	[Gantt bar]																																			
MS	FBK	Website	[Gantt bar]																																			
MS	Fraunhofer	Dissemination and exploitation strategy	[Gantt bar]																																			
MS	metaio	Business Plan	[Gantt bar]																																			
MS	Fraunhofer	Contribution to Standards	[Gantt bar]																																			
MS17		Website available	[Gantt bar]																																			
MS18		Dissemination and exploitation strategy defined	[Gantt bar]																																			
MS19		Dissemination and exploitation report finalized	[Gantt bar]
